1. Company overview

Cargoland Energy Nig. Ltd is an indigenous Nigerian energy services company providing petroleum products supply, aviation fuel services, oil and gas logistics, and marine and offshore support across the upstream, midstream and downstream sectors.

We are a member of Cargoland Group (RC 1217138), a Lagos-based pan-African logistics and trade group holding NCAA and IATA accreditations, with established operations in freight forwarding, customs clearing, warehousing and supply chain management.

Our oilfield and marine logistics services are delivered through our wholly owned subsidiary, Cargoland Oilfield & Marine Logistics Ltd (RC 10024167), with its operational base in Port Harcourt, at the centre of Nigeria's oil and gas industry.

We give international oil companies, indigenous operators and contractors a single accountable Nigerian partner, combining local knowledge, regulatory understanding and logistics capability with a commitment to international standards of safety, quality and governance.

2. At a glance

3. Vision, mission and values

Vision: To be Africa's most trusted indigenous energy logistics and supply company, recognised globally for safety, reliability and integrity.

Mission: To keep energy moving, from production to end user, through dependable supply, efficient logistics, competent partners and safe operations delivered to international standards.

Core values

- **Safety:** People, assets and the environment come before schedule and cost.
- **Integrity:** Transparent, ethical and lawful dealings with clients, partners and regulators.
- **Reliability:** We deliver what we agree, when we agree it.
- **Accountability:** We own our commitments and their outcomes.

- **Excellence:** We benchmark ourselves against international best practice and keep improving.
- **Partnership:** Long-term relationships built on trust and shared value.

4. Leadership

Shadrach Ohai

Managing Director / Chief Executive Officer

Shadrach Ohai founded and leads Cargoland Energy Nig. Ltd and its wholly owned subsidiary, Cargoland Oilfield & Marine Logistics Ltd, where he serves as director.

He is also Founder and Managing Director of Cargoland Group (RC 1217138), a Lagos-based pan-African logistics and trade group with NCAA and IATA accreditations, operating in freight forwarding, customs clearing, e-commerce, fintech, agribusiness and real estate.

He brings that logistics, customs and regulatory experience to Cargoland Energy, so clients get one accountable partner from port to rig.

5. Our core focus

1. **Aviation fuel:** Jet A-1 procurement, supply and into-plane services for airlines, charter operators and aviation service companies.
2. **Oil and gas logistics:** Haulage, heavy-lift, project cargo, customs clearing, warehousing and supply base support.
3. **Marine and offshore support:** Swamp, shallow-water and offshore supply logistics, vessel coordination and quayside services.

6. Services

Downstream: petroleum products and aviation fuel

- Jet A-1, AGO, PMS, DPK, LPG and lubricants supply
- Bulk supply contracts with scheduled delivery
- Aircraft refuelling and marine bunkering, within licensed scope
- Fuel quality control aligned with international aviation fuel practice

Oil and gas logistics

- Haulage of rig equipment, tubulars, chemicals and oilfield materials
- Heavy-lift, low-bed and abnormal-load transport
- Freight forwarding and customs clearance by air, sea and road
- Warehousing, laydown yards and materials management
- Mobilisation and demobilisation of project equipment

Marine and offshore support

- Swamp, shallow-water and offshore supply logistics
- Vessel charter coordination through qualified, compliant providers
- Supply base, shore base and quayside support
- Crew change and personnel logistics

Upstream, midstream and project support

- Procurement of oilfield equipment, materials and consumables
- Storage, terminal and product transfer support
- Engineering and maintenance support through specialist partners

7. Health, safety, security and environment

Safety comes before schedule. Our HSSE approach is built on internationally recognised practice and is designed to meet the expectations of international oil companies and operators.

- Risk assessment and job hazard analysis before every operation
- Permit-to-work, safe handling and journey management procedures
- Stop-work authority for every employee and contractor
- Incident reporting, investigation and lessons learned
- Emergency preparedness and response planning
- Contractors and partners held to the same standards as our own people

Management systems in place: HSE Manual and Policy, Emergency Response Plan, Aviation Fuel Operations Manual, Aviation Fuel Quality Control Manual and Aviation Security Programme.

Certification roadmap: We are implementing management systems aligned with ISO 9001 (quality), ISO 14001 (environment) and ISO 45001 (occupational health and safety), with certification planned.

8. Quality, compliance and governance

- Regulated activities carried out only within licences and permits held
- Compliance with NUPRC, NMDPRA, NCAA, NIMASA and other relevant authorities
- Supplier verification, product conformity checks and full delivery traceability
- Zero tolerance for bribery and corruption, consistent with international anti-corruption standards
- Respect for human rights, fair labour practices and community engagement

Regulatory status: NUPRC permit approved; NCAA and FAAN aviation fuel approvals granted. NCDMB NOGIC JQS registration is next, followed by NIPEX registration.

9. Nigerian and African content

As a 100% Nigerian-owned company, we are committed to the Nigerian Oil and Gas Industry Content Development Act and to building African capability. We prioritise local employment, skills development, local procurement and partnerships with competent African businesses, without compromising the safety and quality standards our clients require.

10. Why Cargoland Energy

- **One accountable partner** across supply, logistics and marine support
- **Logistics heritage** from Cargoland Group's freight, customs and NCAA and IATA credentials

- **Indigenous ownership** aligned with Nigerian content requirements
- **International standards** in safety, quality and ethics
- **Pan-African outlook,** ready to support clients beyond Nigeria

11. Partner with us

We welcome supply agreements, technical partnerships, joint ventures and investment from energy producers, international oil companies, technical service providers, vessel operators and investors.
